

7th Train-the-Foot-Trainer Program 2023

Chennai, India

CHENNAI, INDIA
9 – 12, FEBRUARY 2023

Dear Partners and colleagues

The 7th Train-the-Footer-Trainer program in Chennai will be held 09-12 February 2023. This training course is an initiative of D-Footer International (www.d-foot.org).

It has become a standard training that brings together delegates and the experts in order to enable them to start the national implementation programs and to establish further optimal international networking. We cordially invite you to participate in this unique event that will give you a special opportunity to communicate with your colleagues and other experts-in-the field.

In this brochure you will find as a short description of the background of the Training program, its aims and an overview.

We expect delegates from at least 8-10 countries and experts in diabetic footer from India and other countries.

TRAIN-THE-FOOT-TRAINER PROGRAM

It is a training programme, which teaches course structure, teaching methods, evaluation skills, data collection, strategic organisation / development, networking structures and optimising available resources.

To train national active experts/champions in diabetic footer disease within a global region to deliver effective, well-structured, sustainable training programmes with demonstrable outcomes.

THE OBJECTIVES OF TtFT ARE:

- For each of the delegate teams to organise and implement a Step by Step(SbS) training programme for their own country (educational, organisational and public relations) within 3 years of attending a TtFT course
- To identify and find solutions for their needs and barriers to implementation
- To evaluate the delivered course by collecting and disseminating outcomes of the programme (national/regional/ international)
- To train trainers from their own communities to deliver SbS training programme
- To encourage, support and develop an ongoing mentorship programme for existing and new diabetic footer champions in this region.

DELEGATE SELECTION CRITERIA

In order to attend the TtFT programme as a delegate, a selection process exists with certain eligibility criteria, this is to try to ensure post course implementation. This is vital as generally one-two delegates can attend from each representing country, however in some cases more delegates can attend if a country is large geographically. The selection criteria include evidence of diabetic foot clinical activity, organisational skills, collaboration and support from patient organisation and ministry of health, physician/surgeon and a healthcare professional (as a team) with a willingness to work collaboratively.

- Report to the organisers after 6, 12, 24 and 36 months to the D-Foot International.
- That they will contribute to an anonymised data collection system in line with the international principles of data security and privacy.
